**Step By Step Instructions
For Team and Individual Score Reporting**

Version 1

November 2009

Introduction

This manual provides step by step instructions for using the Scholastic Tools State Association Wrestling Score Reporting System.

This version of the software has recently been enhanced significantly. Please report any problems to your state association wrestling point-of-contact.

When properly used, and support fully, this system will collect every individual bout in your state and allow for easier state tournament seeding.

Important

Wrestling score reporting is a small piece of a much larger system. There are other functions that must be accomplished prior to the entry of match results.

These include the following:

1. Account Access. As a coach, your athletic director must create an account for you to access the system.

2. Eligibility and Rosters. This is usually performed by the athletic director. If there are no wrestlers loaded for your team, please see your athletic director.

3. Scheduling. Your events must be scheduled before you can enter results. Again, this is something the athletic director usually does.

Note: Schools and wrestlers, although real, are used in this document fictitiously to provide examples. There is no implied meaning or suggestion as to the quality of an individual or team. Our apologies in advance if anyone is offended in any way.

Team scheduling comes next. This is a task sometimes done by the state association, and sometimes by the athletic director. Some programs allow the coach to do this.

It is typical for the state association, or maybe league administrator, to enter master schedules, and then have an athletic director fine tune them with non-league games and matches.

B. Create dual meet matchups if they are part of the event.

C. Enter free-standing cooperative bouts, and non dual meet tournament bouts.

More information on the following pages.

Edit Matchups For Events Screen - Detailed Notes

Please refer to preceding page as a reference.

This screen supports both dual meet style events and individual style tournament events.

Depending on your event type, you use this screen differently.

- For dual meet style events, Section A and Section B are required, while Section C would be used only for cooperative wrestlers.

- For tournament style, Section A and Section C are required, and Section B is not used as there are no dual meets to set up.

Section A

This section is used for listing the schools that are participating. All schools, including those of cooperative wrestlers if they exist, must be listed in this section. The section is required for both dual meet and individual tournament style events.

Section B

This is used for creating dual meet matchups for those schools attending your dual meet style event. If you are scheduling an individual style tournament, then this section does not apply.

Section C

This is used for two purposes. Either you have a dual meet style event and you need to enter the results of cooperative wrestlers, or you have an individual style event and you are entering the individual match results.

Enter the dual meet matchup by selecting from the participating teams. You must create matchups before you can enter individual results.

Please note that this might already have been done by athletic directors, or by the opposing coaches.

This is just an example. This is saying that, as part of the quad meet scheduled for 11/28 at Bucksport High, Brewer is wrestling a dual meet at 9am versus Bucksport.

As the results are entered, the dual meet scores are displayed on the front of the main schedule page. When matchups are created, they will be shown as a matchup here (i.e., Team 1 vs Team 2). If matchups are not created, they will just be shown in a list as being participating schools. This support individual style tournaments as well as dual meet style tournaments.

For a individual style tournament, you simply would just add the participating schools and enter the results as cooperative/tournament bouts. No matchups are required.
