

MAINE HIGH SCHOOL GOLF RANKINGS

Maine Golf has developed a **high school golf ranking system**, for both players and teams, that is easy to use and provides an overall look at golfers in all four corners of the State of Maine.

This type of information and feedback is intended to **elevate the golfer experience** while being fun for fans, students, parents and coaches across Maine!

The basis for determining the ranking is the **9-hole gross score** compared to the slope and course rating of the course played. The calculation is a “differential” that is comparable to other differentials for purposes of a ranking only.

The data is **input by the golf coaches**. It’s simple and password protected for each school. Most of the information is **pre-populated** from the USGA GHIN Handicap System and the MPA Golf Bulletin.

The result is a comparison of play that can be sorted by player, by school, by grad year, by gender, by league, by classification. Or an overall comparison on a statewide basis!
